

Object Detection In Automated Software Testing

Before

After

BrightSight

Object Detection Application

Create dataset

Upload screenshots, create labels, draw bounding boxes, and augment

Train

Choose YOLOv9 and/or RT-DETR, set training parameters

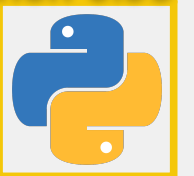

Test

Upload new screenshots and study the detection result

Use

Use the trained models in an automated testing process

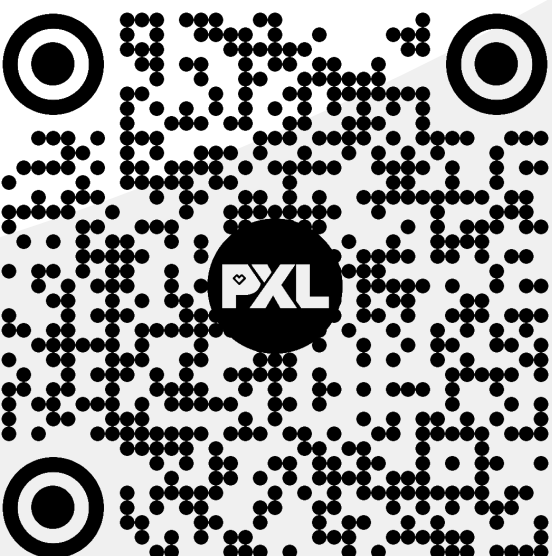

Python 0.99

NiceGUI 0.99

Ultralytics 0.99
